## Roof safety scaffolds

### Purchaser

Construction and real estate industry

### J.H.K. service

Scaffolding

### Venue

Oldenburg area, Germany

### Project period

03/2017 – 04/2018

In close cooperation with local roofers our roof safety scaffolds were erected at different kinds of buildings. These scaffolds are being required for the erection at existing real estate to renovate roof surfaces as well as at new buildings for the construction of roofs. It goes without saying that highest priority is given to the indispensable safety requirements to ensure accident-free works also in considerable working heights.
