Production of topside modules for F.P.S.O.

For a production and storage ship of the offshore mineral oil industry G & K Montagengesellschaft was entrusted with the production of different modules. The service provision included detail engineering, steel and pipeline construction of topsides as well as pipeline assembly on the tanker. With this special project we could prove our special competencies in complex and technically demanding plants.

Order

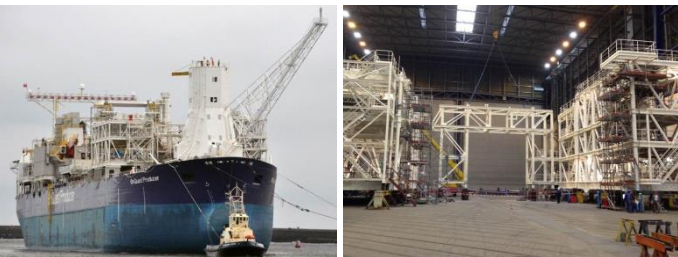

- Detail engineering
- Topside equipment for steel, pipeline construction
- Manufacture and assembly

Service provision

- Detail engineering and construction
- Planning, prefabrication, assembly, documentation

Benefits for our customers

- + Project from one source
- + Modular design
- + Safety technology on highest level
- + Large heavy constructions as unit
- + Heavy construction by water transportation
