J.H.K. service
Scaffolding

Venue
Oldenburg area, Germany

Project period
03/2017 – 04/2018

Various purchasers ordered scaffoldings at façades of new buildings and renovation. Steeples as well as gasometers and residential towers are part of the building diversity. We did the professional scaffolding under highest safety requirements enabling the continued use of the building also during the construction phase. Both our diverse industrial customers and the real estate and construction industry make use of our strong performance.
