

Reference Detonation protection – Exchange and Repair Offshore

Purchaser

German Oil and Gas
company

Venue

German sea, Germany

J.H.K. service

Flame arrester, permanent
fireproof ventilation hoods

Project period

03/2018

For 30 years a flawless operation of a drilling and protection platform at the marginal sea of the Atlantic Ocean has prevailed by using highest technology, highly qualified employees and complex supervision and safety systems. Flame arresters are used as permanent fireproof deflagration arresters. Service and maintenance of these fittings were to be evaluated on site and confirmed with an acceptance protocol with regard to the compliance with the ATEX Directive and the national industrial safety ordinance. The environmental protection requirements have had highest priority for the performance of M+F Technologies.
